

Stock Market End Game 2021

Fantasy Free Economics, James Quillian

Posted on [October 15, 2021](#) by [Fantasy Free Economics](#)

This is the stock market end game. Yes, it is happening right now. How do I know? It is obvious. The difference is that I am able to look and notice what is right in front of my eyes.

In forty years or so information will become unclassified. Reasons for what is happening will have become completely obvious just like it always does.

In the sixties, Lyndon Johnson faked the Gulf Of Tonkin Resolution and incident as a means of accelerating the Vietnam war. The result was that many countless North Vietnamese died as a result. Does anyone care today? Does it bother anyone today. Should it? If it does, I haven't noticed.

Will the truth ever come out about what is being done to the United States today? That depends on whether or not the country will survive in a recognizable form. I don't think it will. The entire country is consumed in mal-adaptive behavior. A free society would have to develop and the one we have had has denigrated. Americans simply do not identify as free people and are volunteering by slavery by the multitudes. Americans are getting their wish.

Would it not be nice if it was possible for folks to have all of their life's decisions made by government in ways that made their lives better and created a wonderful path for living? Our original approach was just the opposite. Being free sounds appealing but it creates stress. Americans can't cope with that stress so they are turning over their freedom to their betters. That guarantees complete misery for us all. That is what people want. The process is in place. Outside of devise intervention, I can't think of a thing that can be done to save the country.

On September 12, made the following post. I explained what was coming during the weak fall seasonal pattern.

[Stock Market September Thru October Fall Seasonal Pattern](#)

.My forecast was that an attempt to leap frog over the seasonal weakness would be made. It happened but the leap was much less pronounced than I had anticipated. This has happened in every year since 2006 when manipulation began to be accelerated beyond depending on benefits from the Federal Reserve alone. Exceptions have been a few occasions when the sell side volume suddenly became unmanageable. According to popular thought, that was then and this is now. So, is it rational to assume that corruption was present in the sixties but all is fine now. You decide.

Make no mistake, the averages are being held up artificially. Efforts to launch a new leg to the uptrend are ongoing. The slightest pin prick will cause it all to implode. That doesn't mean there is not a plan in place for if that happens. I am certain there is.

Taking over the world and enslaving as much of the world's population by use of military. is old school. Financial engineering is the new tool. So, everyone hunker down. Congratulation Americans. You have been successfully enslaved and no one fired a shot at you. Is that not the epitome of efficiency. Congratulations to the deep stake.

I wrote the following article back in August 2020. Take a look at it if you have time
